Vertical Tank Air Compressor for Industrial Use

This vertical tank air compressor is suitable for industrial and commercial applications. Its design includes a robust motor and pump, pressure gauge, and drain valve.

Overview

Industrial Vertical Air Compressor

This high-performance vertical tank air compressor is engineered for demanding industrial and commercial environments. Its vertical orientation maximizes floor space efficiency while providing consistent, reliable pneumatic power for workshops and garages. The unit is designed with a durable motor and pump assembly, ensuring long-term operational stability and ease of maintenance.

Performance Metrics

Power Rating

1.5 KW	2 HP
Power	Horsepower

Displacement	170 L/min
Airflow	6 CFM

Technical Specifications

Discharge Pressure

115 Psi	8 bar
Pressure	Pressure

Tank Capacity

115 L	30 Usgal
Capacity	Capacity

Mechanical Configuration

Attribute	Value
Cylinder Configuration	¦51×2mm
Rated Speed	1050 r/min
Noise Level	89 dB(A)

Dimensions and Weight

Dimensions (L x W x H)	65 x 47 x 121 cm
Net Weight	83 kg
