

0.5 Ton Capacity Chain Block

This chain block provides a 0.5 ton lifting capacity for various industrial and construction tasks. It is made with high-strength alloy steel for durability, ensuring safe and efficient vertical lifting.

Overview

HSC Series Chain Block

The HSC series chain block is an updated, high-performance lifting solution designed based on advanced Japanese C-type engineering principles. Featuring improved internal components and a refined, attractive appearance, this tool is built for reliable and efficient vertical lifting. It is an ideal choice for industrial and construction environments requiring consistent, heavy-duty operation.

Technical Specifications

Lifting Capacity

0.5 Ton

Capacity

Standard Lift Height	2.5 - 12 meters
Customization Options	Yes
Design Standard	Japanese C Type

Certifications

Compliance & Standards	CE Certified
