Car Reverse Radar System with LED Display

This car reverse radar system features a dual seven-segment color LED dynamic display for indicating distance. The system provides visual alerts to assist with parking and maneuvering in reverse.

Overview

Advanced Car Reverse Radar System

This car reverse radar system is designed to enhance vehicle security and safety during parking and reversing maneuvers. It features a dual seven-segment color LED dynamic display that provides real-time distance information to the driver. By offering clear visual alerts, the system helps prevent collisions and assists in navigating tight spaces with confidence.

Display & Interface

Alert System

Visual Distance Indicators • Dynamic Alerts

Display Technology	Dual seven-segment color LED dynamic display

Safety & Security

Primary Function

- Parking assistance
- Reverse maneuvering support
- Collision prevention
- Real-time distance monitoring

Safety Category	Car Security, Safety Systems

Technical Specifications

Model Series	A Series
Measurement Unit	Meters (m)
