

0.8L Stainless Steel Electric Kettle

This electric kettle quickly boils water with its 1350W heating element. The kettle features a stainless steel body and a 0.8L capacity.

Product Overview

Efficient Boiling Solution

This 0.8L stainless steel electric kettle is engineered for rapid water heating in compact kitchen environments. Featuring a robust 1350W heating element, it ensures quick boiling times while maintaining a sleek, durable design with black accents. Its user-friendly construction includes an integrated power base with a visual indicator, making it a reliable choice for daily hot water needs.
