Mobile Water Pumping Station

This mobile pumping station is designed for water removal and transfer. It features a truck-mounted unit with a large submersible pump, hydraulic arm for positioning, and integrated control systems.

Overview

Mobile Water Pumping Solution

This truck-mounted mobile pumping station is engineered for efficient water removal and transfer operations. Featuring a robust submersible pump and an integrated hydraulic arm for precise positioning, the system is designed for rapid deployment. It serves as an essential tool for flood control, construction site dewatering, and emergency water management scenarios.

Technical Specifications

Key Components

- Large submersible pump
- Hydraulic positioning arm
- Integrated control system
- Vehicle-mounted chassis

System Type	Truck-mounted mobile pumping station

Applications

Primary Applications	Flood Control, Construction Dewatering, Emergency Water Management

Rooms 05–15, 13A/F South Tower, World Finance Centre, Harbour City, 17 Canton Rd, Tsim Sha Tsui, Kowloon, Hong Kong
