Pipe and Tube Cutting Power Tool

This power tool is designed for cutting pipes and tubes. It features a robust metal frame with a cutting mechanism suitable for various materials.

Product Overview

Professional Pipe and Tube Cutting Solution

The DT-3 is a specialized power tool engineered for precision cutting and shaping of cylindrical materials. Its robust metal frame and ergonomic handle design ensure stability and control during operation. This versatile tool is compatible with a wide range of pipe materials, making it an essential asset for plumbing, construction, and metal fabrication workflows.

Technical Details

Design Features

- Robust metal frame construction
- Ergonomic yellow handle for grip
- Versatile cutting mechanism
- Adaptable for non-cylindrical profiles

Model Number	DT-3

Compatibility

Supported Materials	White Pipe, Green Pipe, Black Pipe, Rectangular Profiles
