Reinforced Resin Grinding Wheel for Metal

Abrasive grinding wheel designed for cutting and grinding metal. It features a reinforced resin bond for enhanced durability and safety during use with angle grinders.

Product Overview

High-Performance Industrial Grinding

This reinforced resin grinding wheel is engineered for demanding metalworking applications, offering a balance of durability and aggressive cutting performance. Designed specifically for use with angle grinders, the resin bond construction ensures structural integrity and safety during high-speed operation. It is an essential tool for professional industrial environments requiring reliable abrasive solutions.

Technical Specifications

Max Operating Speed

80 m/s
Max Speed

Abrasive Specification	27A, WA24R

Application & Usage

Intended Application

- Metal cutting
- Metal grinding
- Industrial applications
- Professional use

Tool Compatibility	Angle Grinders

Safety & Compliance

Construction

Reinforced Resin Bond
