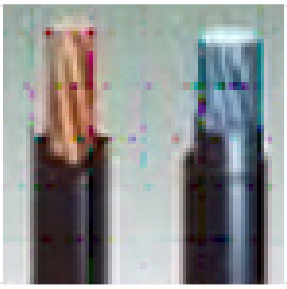
Single-Conductor Communication Cable

This is a single-conductor communication cable with copper conductor and thermoplastic insulation. It is designed for reliable signal transmission in electronic and communication applications.



Product Overview

Reliable Single-Conductor Communication Solution

This single-conductor communication cable is engineered for high-performance signal transmission in various electronic environments. Featuring a high-quality copper conductor and durable thermoplastic insulation, it ensures consistent connectivity and long-term reliability. The cable is available in multiple sizes and insulation colors to meet specific project requirements and industry standards.

Technical Highlights

Key Performance Metrics

1 Core
Conductor Count

Performance Rating

Reliable Signal Transmission

Material Specifications

Conductor Material	Copper
Insulation Material	Thermoplastic

Application & Versatility

Primary Applications

- Electronic applications
- Communication systems
- Signal transmission

Customization Options

Available Customizations	Multiple Sizes, Various Insulation Colors

Rooms 05–15, 13A/F South Tower, World Finance Centre, Harbour City, 17 Canton Rd, Tsim Sha Tsui, Kowloon, Hong Kong
