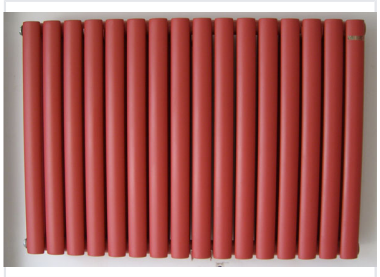
Vertical Multi-Column Radiator

This vertical radiator features a multi-column design for optimal heat distribution. Its sleek, space-saving design and durable construction make it suitable for diverse interior settings.



Product Overview

Modern Vertical Radiator

This vertical multi-column radiator is designed for high-efficiency heat distribution in professional and modern interior settings. Its sleek, space-saving profile combines robust structural durability with a sophisticated powder-coated red finish. Engineered to resist corrosion, this unit offers a reliable heating solution while enhancing the aesthetic appeal of any commercial or residential space.

Technical Specifications

Color
Red

Design	Vertical Multi-Column
Finish	Powder-coated

Performance Features

Key Performance Indicators

1 High
Corrosion Resistance

1 Efficient
Heat Distribution

Core Benefits	Durable Construction, Space-Saving, Corrosion Resistant, Modern Aesthetic
