1.5V C Size Carbon-Zinc Battery

This 1.5V C size carbon-zinc battery is suitable for general-purpose applications. It is mercury and cadmium-free, making it an environmentally conscious choice for powering toys, radios, and flashlights.

Product Overview

Reliable Power Solution

This 1.5V C size carbon-zinc battery is engineered for general-purpose applications requiring a dependable and economical power source. Featuring a 'Super Heavy Duty' design, it offers an enhanced lifespan compared to standard carbon-zinc alternatives. The battery is strictly mercury and cadmium-free, ensuring compliance with modern environmental safety standards.

Technical Specifications

Battery Size	C (R14P / UM-2)
Nominal Voltage	1.5 V
Chemistry	Carbon-Zinc

Performance & Compliance

Performance Grade Super Heavy Duty	
Environmental Safety	0% Mercury, 0% Cadmium

Applications

Recommended Applications

- Toys
- Radios
- Flashlights
- General-purpose electronics
