800W Electric Motorcycle with Front Basket

This electric motorcycle is equipped with an 800W motor and reaches speeds up to 25km/h. A large front basket provides convenient storage.

ADDITIONAL IMAGES

Overview

Compact design with a large front carrying basket for urban utility.

Efficient Urban Mobility

This 800W electric motorcycle is designed for convenient and reliable urban commuting. Featuring a robust carbon steel frame and a high-capacity 48V 20Ah lithium battery, it offers a smooth ride with efficient shock absorption and stable drum braking. With its integrated front basket and clear digital dashboard, this vehicle combines practical utility with modern electric performance for daily errands.

Performance

Key Performance Metrics

800 W	25 km/h	65 N.m	150 kg
Rated Power	Max Speed	Max Torque	Max Payload

Climbing Capability	10 °

Battery & Power

Battery Specifications

Parameter	Value
Type	Lithium
Voltage	48V
Capacity	20Ah
Standard Charging Current	5A

Framework & Dimensions

Robust frame construction designed for durability and comfort.

Equipped with efficient shock absorption for smooth riding on various road conditions.

Dimensions

- Length: 1440mm
- Width: 670mm
- Height: 1060mm
- Wheelbase: 1170mm
- Seat Height: 760mm
- Ground Clearance: 120mm

Construction	Carbon Steel Frame, Steel Swingarm, Vacuum Tires

Safety & Features

Clear digital dashboard providing complete operational data.

Lighting System

LED Headlamp • LED Turning Lights • LED Tail Light • LED Braking Light

Braking System	Front and Rear Drum Brake 110mm with hand brake
