

10000E Gasoline Generator

The 10000E gasoline generator provides a stable and consistent power supply for a variety of applications. It features a robust engine and a user-friendly control panel with a V/APH meter, and safety features such as a circuit breaker and urgent stop button.

Overview

High-Performance Gasoline Generator

The 10000E Gasoline Generator is a robust and reliable power solution engineered for consistent performance in various professional and commercial applications. Built with a powerful 4-stroke single-cylinder engine and a large 35-liter fuel tank, it offers extended continuous operation times. It features essential safety mechanisms including an urgent stop button, circuit protection, and an automatic voltage regulator to ensure stable power delivery.

Performance Metrics

Power Output

8 KVA

Rated Power

8.5 KVA

Max Power

220 V

Rated Voltage

50 Hz

Frequency

Engine Specifications

Engine Configuration

Feature	Specification
Engine Type	4-stroke forced-cooled single-cylinder
Engine Model	KP460
Displacement	460 ml
Ignition System	Non-contact transistorized magneto (TCI)
Starting System	Manual, Electric

Operational Data

Runtime & Capacity

- Fuel Tank Capacity: 35 L
- Fuel Consumption: 3.2 L/hr
- Continuous Operating Hours: 10 hr
- Engine Oil Capacity: 1.1 L

Noise Level

80 dB

Physical Attributes

Physical Dimensions & Weight

- Net Weight: 90 kg
- Carton Dimensions: 730 x 565 x 590 mm

Logistics

Container Load Capacity

122 units (20GP) / 254 units (40GP) / 254 units (40HQ)
