9.0 HP 4-Stroke Gasoline Engine

This 4-stroke gasoline engine provides 9.0 HP for various applications. Its robust construction ensures reliable performance for powering equipment such as generators and water pumps.

Overview

High-Performance 4-Stroke Engine

The 9.0 HP 4-Stroke OHV Gasoline Engine is a reliable and powerful solution designed for versatile industrial and residential applications. Engineered for efficiency and durability, this unit features a robust construction suitable for powering generators, water pumps, and various heavy-duty machinery. Its dual-start system and optimized combustion design ensure consistent performance and ease of use in demanding environments.

Performance

Maximum Output

9 HP	3600 rpm
Power	Speed

Displacement	270 cc
Fuel Consumption	290 g/kw.h

Technical Specifications

Engine Type	4-Stroke OHV Gasoline Engine
Starting System	Recoil starting, Electric starting
Ignition System	Transistorized ignition

Capacities

Fuel Tank Capacity	5.9 L
Oil Capacity	1.1 L

Dimensions and Weight	
Dry Weight	27 kg
Dimensions (LxWxH)	380x430x410 mm
