

# 1000A AC Split Core Current Transformer

This split core current transformer is designed for easy installation in circuit systems and networks. Its casting materials are made from high extinguishing PA66 and comply with IEC6004-1, BS7626, VDE0414-44-1, and UI94 standards.

## Product Overview

### Professional AC Current Measurement

The 1000A AC Split Core Current Transformer is engineered for seamless integration into existing circuit systems and networks. Designed with a split-core configuration, it allows for quick and easy installation without the need to disconnect existing wiring. Constructed from high-extinguishing PA66 material, this unit ensures durability and safety for demanding industrial energy management and power monitoring applications.

## Technical Specifications

### Rated Current

**1000 A**

Rated Current

### Compliance Standards

IEC6004-1, BS7626, VDE0414-44-1, UI94

## Design & Construction

Housing Material	High extinguishing PA66
Core Type	Split Core
Model Series	DBP
