Abrasive Cut-Off Wheel for Electric Tools

Abrasive cut-off wheel designed for use with electric tools. Engineered for high-speed cutting applications with a maximum operating speed of 80 m/s.

Product Overview

High-Performance Abrasive Cut-Off Wheel

This abrasive cut-off wheel is engineered for precision and efficiency when working with metal and other hard materials. Designed specifically for electric tools, it features a durable bond construction that ensures consistent material removal in demanding industrial and construction environments. With a maximum operating speed of 80 m/s, this wheel provides the reliability professionals need for high-speed cutting applications.

Technical Specifications

Maximum Operating Speed

80 m/s
Max Speed

Primary Applications	Metal Cutting, Hard Materials, Industrial Use, Construction
Compatible Tools	Electric Tools
