AD56-16 Series Double Color Indicator Light

The AD56-16 series indicator light is a compact signaling device for industrial use. This double-color indicator features a Æ16mm mounting size and provides clear visual status indication.

Product Overview

AD56-16 Series Double Color Indicator Light

The AD56-16 series indicator light is a compact and versatile signaling device engineered for diverse industrial environments. With a 16mm mounting diameter, this double-color indicator provides clear, reliable visual status feedback for control panels, automation equipment, and security systems. It is designed to operate efficiently across both AC and DC power systems, ensuring durable performance in demanding applications.

Technical Specifications

Mounting Size	16 mm
Voltage Compatibility	AC, DC
Rated Voltage	24V

Features

Key Features

- Double color visual indication
- Compact 16mm design
- Suitable for automation control panels
- Compatible with AC/DC systems
- Durable construction for industrial use

Application

Typical Applications

Emergency Lighting • Security Systems • Control Panels • Automation Equipment
