Automatic Water Pressure Booster Pump

The Automatic Water Pressure Booster Pump is designed to automatically boost water pressure in residential and light commercial applications. It features a durable construction with a brass impeller and a pressure tank for consistent water supply.

Product Overview

High-Performance Water Pressure Solution

This automatic water pressure booster pump is engineered to provide consistent and reliable water pressure for both residential and light commercial environments. Featuring a durable brass impeller and an integrated pressure tank, it ensures a steady supply for showers, faucets, and various water fixtures. The intelligent automatic pressure switch optimizes energy usage by activating only on demand, while providing essential protection against dry running.

Technical Specifications

Operation Type

Automatic • Pressure-Controlled

Key Features

- Automatic pressure switch
- Dry-run protection
- Integrated pressure tank
- Energy-efficient operation

Impeller Material	Brass

Application

Suitable Applications	Residential, Light Commercial, Shower Systems, Faucet Pressure Boosting
