Car Entertainment System with Touch-screen and Bluetooth

This car entertainment system features a color screen with a full touch operating system and automatic reversing camera. It supports AV input, automatic light sensing, and includes built-in Bluetooth hands-free calling.

Overview

Advanced In-Car Entertainment System

This comprehensive car entertainment system features a high-resolution color touchscreen with a responsive, intuitive operating system. Designed for seamless integration, it supports automatic reversing camera functionality, built-in GPS navigation with handwriting input, and hands-free Bluetooth connectivity. It offers broad compatibility with dozens of vehicle models, utilizing original car-style panels and wiring for a professional, factory-fit installation.
