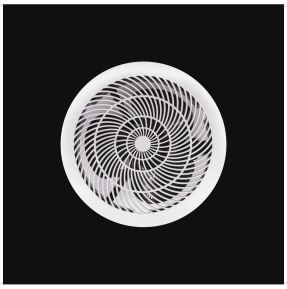
Circular Air Ventilator with Spiral Grille

This circular ventilator is designed for efficient air extraction. It features a spiral grille pattern for optimal airflow and safety.



Product Overview

High-Efficiency Circular Air Ventilator

This circular air ventilator is engineered for high-performance extraction in residential or commercial spaces such as bathrooms and kitchens. It features a unique spiral grille design that maximizes airflow while maintaining safety and durability. Constructed from high-quality plastic, it offers easy maintenance and quiet, reliable operation for indoor environments.
