Product Overview

High-Performance Diesel Generator Sets

This diesel generator series provides versatile power solutions ranging from 10KVA to 220KVA, powered by premium engine technology. Engineered for reliable and efficient energy production, these units feature robust base frames and integrated control systems to ensure consistent performance. They are ideal for industrial and commercial applications requiring a dependable backup or primary power source.

Technical Specifications

Configuration Matrix

Frequency	Voltage (3P)	Speed
50Hz	400V/230V	1500rpm
60Hz	220V/127V	1800rpm

Capacity Range	10KVA, 220KVA
----------------	---------------

Safety & Features

Control System Features

- Emergency stop button
- Voltage meter
- Current meter
- Warning indicators

Build Specifications

- Radiator cooling system
- Heavy-duty base frame
- Integrated vibration isolators
- On-board fuel tank
