Digital Temperature Controller with LED Display

This digital temperature controller features a four-digit LED display capable of showing temperatures up to 99.99 degrees Celsius. It is equipped with a reset button, an 'ON' indicator light, and a secondary numerical display, housed in a panel-mountable enclosure.

Product Overview

Precision Temperature Control

This digital temperature controller is designed for high-precision thermal management in industrial and commercial environments. Featuring a clear four-digit LED display, it allows for accurate monitoring of temperatures up to 99.99°C. The unit is built into a compact, panel-mountable enclosure, making it an ideal solution for integration into control panels and machinery.

Technical Specifications

Maximum Temperature	99.99 °C
Display Type	Four-digit LED display
Mounting Style	Panel Mount

Features

Key Features

- Reset button functionality
- Visual 'ON' indicator light
- Secondary numerical setpoint/calibration display
- Compact enclosure design

Compliance	Digital Control, Industrial Grade, Panel Ready
