Dynamic Wired Microphone for KTV and Vocal Performance

This dynamic wired microphone is designed for KTV and vocal performances. It features a large cartridge and durable cable for reliable sound reproduction.

Product Overview

Professional Vocal Performance

The PT-716 is a high-quality dynamic wired microphone engineered for KTV, karaoke, and general vocal applications. Its professional-grade design ensures robust sound reproduction with a durable metal construction built for longevity. Featuring a cardioid polar pattern, it effectively minimizes background noise and feedback to deliver a clean, focused vocal output suitable for both amateur and professional audio setups.
