Product Overview

Professional ECU Flashing Solution

The EOBD2 1260 is a specialized hardware interface designed for automotive chip tuning and engine performance optimization. It enables professionals to read and write data to various Engine Control Units (ECUs), facilitating engine remapping and parameter adjustments. Compatible with a wide range of modern diesel and petrol vehicles, this tool provides essential diagnostic and tuning capabilities for automotive technicians.

Compatibility & Support

Supported ECU Types	EDC16, EDC15, MEx.x, DELCO
Engine Compatibility	TDi, HDi, JTD, Petrol, Diesel
