

10W 60cm LED Tube Light with Milky Diffuser

This 10W 60cm LED tube light is a high-lumen light source, offering excellent energy efficiency and high-quality illumination. With a lifetime of at least 50,000 hours, it can be used as a retrofit LED tube for fixtures or as a light source for new LED luminaires.

Product Overview

Efficient LED Lighting Solution

This 10W LED tube light is designed as a direct, energy-efficient replacement for traditional fluorescent tubes. Measuring 60cm in length, it features a high-quality milky diffuser that ensures uniform light distribution for comfortable, glare-free illumination. Built for durability and consistent performance, it is an ideal choice for various indoor lighting environments.

Technical Specifications

Power Consumption	10 W
Length	60 cm
Diffuser Material	Milky
Application	Indoor Lighting, Commercial, Residential

Performance Metrics

Key Features

- Energy efficient design
- Uniform light distribution
- Durable construction
- Standard voltage operation
- Easy installation
