Electric Treadmill for Indoor Fitness

This electric treadmill is designed for indoor running and walking. It features adjustable speed and incline settings displayed on a digital console, along with handrails and a cushioned running deck.

Overview

Professional Indoor Fitness Solution

This motorized treadmill is engineered for efficient indoor cardio training, offering a balanced combination of performance and convenience. With a 1.5HP motor and a versatile speed range, it supports a variety of workout intensities suitable for home or gym environments. The inclusion of preset programs, integrated media support, and a space-saving hydraulic folding system makes it an ideal choice for fitness facilities looking to provide accessible and reliable equipment.
