

110-Person Inflatable Life Raft

This inflatable life raft has a maximum storage height of 18~36m. It is designed for life-saving purposes and is compliant with SOLAS(74/96) and MSSC.81(70) standards.

Product Overview

High-Capacity Maritime Safety

This inflatable life raft is engineered for critical maritime safety, specifically designed to accommodate up to 110 persons in emergency situations. It features a durable, multi-layered inflatable structure that ensures optimal buoyancy and stability on the water. The raft includes a highly visible orange canopy for protection against the elements and is equipped with essential safety features such as boarding ramps and external lifelines.

Technical Specifications

Capacity	110 persons
Compliance	SOLAS-compliant

Features

Safety Equipment

- Boarding ramps
- External lifelines
- Emergency supply provisions
- High-visibility orange canopy

Design

Construction

Multi-layered structure • Inflatable design • Weather-resistant canopy

Applications

Suitable For

- Commercial vessels
- Offshore platforms
