Product Overview

Professional Food Slicing Performance

This versatile food slicing machine is engineered for precision and durability, making it an essential tool for consistent food preparation. Featuring a powerful gear-driven motor and a high-quality stainless steel blade, it effortlessly handles a variety of ingredients from meats and cheeses to breads and vegetables. With adjustable thickness control and a secure, non-skid design, this slicer offers both efficiency and safety for professional kitchen environments.

Technical Specifications

Motor Power

110 W	170 W
Rated Power	Max Power (Optional)

Control Features

Pulse Function • Knob Adjustment • ON/OFF Switch

Blade Diameter	170 mm
Cutting Thickness Range	0 - 23mm

Design & Build

Safety & Stability

- Non-skid suction feet
- Transparent food tray
- Carriage with stainless steel cover
- Removable blade for cleaning

Housing Materials	Metal, Plastic, Aluminum, Stainless Steel
Drive System	Gear-driven
