

110cc Step-Through Motorcycle

This step-through motorcycle features a compact design with an emphasis on fuel efficiency. Equipped with a four-stroke, air-cooled 110cc engine and a semi-automatic transmission, it provides adequate power for urban commuting and short-distance travel.

Overview

Reliable Urban Commuter

The SL110-7 is a versatile step-through motorcycle designed for efficiency and ease of use in urban environments. Featuring a robust four-stroke, air-cooled engine, it offers a practical balance of power and fuel economy for short-distance travel. With its semi-automatic transmission and lightweight steel frame, this motorcycle provides a user-friendly and durable transportation solution.
