High Pressure Washer Motor for Home Appliances

This high-pressure washer motor is designed for household electrical appliances. It features a robust construction with a black plastic housing and includes a gear assembly for power transmission.

Overview

High-Performance Washer Motor

This high-pressure washing machine motor is specifically engineered for household electrical appliances, offering reliable power for cleaning tasks. It features a durable construction with a protective black plastic housing and visible stator windings for efficient operation. The unit comes fully equipped with an integrated gear assembly for effective power transmission and necessary electrical wiring for straightforward connectivity.

Technical Specifications

Design

High-pressure compatible • Robust construction

Primary Application	Household electrical appliances
Key Components	Black plastic housing, Stator windings, Integrated gear assembly, Electrical wiring
