

1.14kV Vertical AC Vacuum Contactor

This vacuum contactor suits AC 50Hz power networks with a main circuit rated voltage of 1140V. It is used for remote circuit breaking and frequent motor, transformer, and capacitor bank control.

Overview

High-Performance Vacuum Contactor

This vertical AC vacuum contactor is engineered for demanding power network environments operating at 50Hz. Designed for reliability, it excels in making, breaking, and frequently starting AC motors, making it an ideal component for magnetic starters and large mineral lapping switch equipment. It provides a robust solution for high-voltage switching requirements while adhering to international safety and performance standards.

Electrical Ratings

Rated Voltage	1140 V
Rated Current Range	1000 - 1250 A
Operating Frequency	50 Hz

Standards & Compliance

Standards Compliance	GB/T 14048.4, IEC 60947-4-1, JB/T 7122
----------------------	--

Applications & Compatibility

Compatible Protection Devices

- JDB electronic integrated protection
- JR9 type over current protection
- RC absorption device

Primary Applications

AC Motor Control • Magnetic Starters • Anti-Explosion Equipment • Mineral Lapping Switch Equipment
