

11KV Porcelain Electrical Insulator

This 11KV porcelain electrical insulator provides insulation and mechanical support for conductors. It is suitable for string, standoff, and pin-type applications.

Overview

High-Voltage Porcelain Insulator Solutions

This 11KV porcelain electrical insulator is engineered for reliable performance in power transmission and distribution networks. It provides essential mechanical support and electrical insulation for conductors, effectively preventing current leakage and maintaining safe clearances. Designed for versatility, it is suitable for string, standoff, and pin-type applications in various utility environments.

Technical Specifications

Close-up of the porcelain pin-type insulator showing the ANSI 56-3 design for high-voltage applications.

Voltage Rating

11 KV

Rated Voltage

Insulator Configurations	String, Standoff, Strain, Pin Type, Disc
Material	High-durability Porcelain
Standard Compliance	ANSI 56-3

Applications

Suitable Networks

- Power Transmission Systems
- Distribution Networks
- Utility Infrastructure
- Cable and Fiber Optic Networks
- Overhead Line Fittings

Quality & Certification

Certifications

CE • ISO 9001 • UL • BV • SGS

Service & Logistics

Service Capabilities

Service Type	Details
OEM Service	Available
Samples	Free samples provided
Lead Time	Approx. 15 days for large orders
Warranty	1 Year
