# Industrial Oil Press for Seeds and Nuts

This industrial oil press efficiently extracts oil from seeds and nuts. It features a vertical pre-treatment vessel and a horizontal screw press, ensuring continuous operation and high oil yield.

## Overview

### Industrial Oil Extraction Solution

This industrial oil press is engineered for high-efficiency extraction from a wide variety of seeds and nuts. Designed for continuous, heavy-duty operation, the system integrates a vertical cylindrical pre-treatment vessel with a precision-engineered horizontal screw press. It is an ideal solution for large-scale agricultural processing facilities seeking reliable performance and high oil yields.
