Industrial Overlock Sewing Machine for Garments and Shoes

This high-speed industrial sewing machine is designed for garment, shoes, and accessories manufacturing. The overlock machine features adjustable settings for versatile fabric handling and a precision cutting system for clean edges.

Product Overview

High-Performance Industrial Overlock Solution

This high-speed industrial overlock sewing machine is engineered for demanding production environments in garment, shoe, and accessory manufacturing. It features a robust construction designed for continuous operation, ensuring reliability and longevity on the production floor. With multiple thread capability for superior seam strength and an integrated precision cutting system, it delivers clean, professional edges on a wide variety of fabrics.

Technical Specifications

Model Identifier	BR9504-01GB
Certifications	CE

Performance Features

Suitable Applications

- Garment manufacturing
- Shoe production
- Accessories assembly

Operational Capabilities

High-Speed Operation • Multiple Thread Capability • Precision Cutting System • Adjustable Fabric Handling
