

1.1kW Sewage Pump 220V

This 1.1kW sewage pump operates at 220V. It is designed for effective drainage and wastewater management in demanding environments.

Product Overview

Robust Wastewater Management

This 1.1kW sewage pump is engineered for demanding wastewater applications, providing reliable performance in harsh environments. Designed to handle sewage, effluent, and solids-laden liquids, it ensures effective drainage and consistent operation. Its durable construction makes it an ideal solution for professional wastewater management systems.

Technical Specifications

Power Rating

1.1 kW

Power Output

Operating Voltage

220V

Suitable Applications

Sewage, Effluent, Solids-laden liquids, Wastewater Management

Features

Key Performance Features

- High-efficiency motor
- Durable construction for harsh environments
- Designed for solids handling
