

12" 1200W 2-Way Powered Arrayable Loudspeaker

This 2-way powered arrayable loudspeaker provides high-definition audio from a lightweight and compact design. The birch cabinet houses a 12" neodymium woofer and a pair of 1.7" compression tweeters for crisp, natural audio reproduction with a wide frequency response.

Product Overview

Professional Arrayable Audio Solution

This 12-inch 2-way powered loudspeaker is engineered for high-performance audio environments requiring versatile array configurations. With a robust 1200W amplifier, it delivers powerful sound output suitable for demanding professional applications. The combination of a specialized low-frequency driver and a high-frequency compression driver ensures exceptional clarity and coverage.

Technical Specifications

Power Output	1200 W
Low-Frequency Driver	12 inch
System Type	2-Way Powered Arrayable
