Industrial Pedestal Fan with Adjustable Tilt

This industrial stand fan is designed for powerful air circulation in large spaces. Its adjustable height and tilt allow for customized positioning and directional airflow.

Overview

Industrial-Grade Air Circulation

This industrial pedestal fan is engineered to provide powerful, reliable air circulation in demanding environments such as warehouses, factories, and workshops. Built with a robust metal construction and a high-efficiency 100% pure copper motor, it ensures long-lasting performance and effective cooling. With multiple size, blade, and base configurations available, this fan offers the versatility needed to meet specific ventilation requirements.

Technical Specifications

Available Sizes

- 20 inch (500mm)
- 24 inch (600mm)
- 26 inch (650mm)
- 30 inch (750mm)

Motor Composition	100% Pure Copper
Blade Configuration	2 Blades, 3 Blades, 4 Blades

Design & Construction

Base Options

Base Shape	Material Options
Round	Full Iron
Cross	Iron with Plastic / Plastic

Blade Material

Aluminum
