Infrared Surveillance Camera with Night Vision

This surveillance camera is equipped with infrared LEDs for superior night vision. Its robust design includes a protective casing and sun shield, making it suitable for outdoor security applications.

Overview

Advanced Infrared Surveillance

This high-resolution surveillance camera is engineered for reliable monitoring in diverse lighting conditions, featuring advanced infrared LED technology for superior night vision. Housed in a robust, weather-resistant casing with an adjustable sun shield, it is built to withstand outdoor environments while providing comprehensive security coverage. Its wide-angle lens ensures maximum visibility, making it an ideal choice for professional security applications requiring consistent and clear footage.

Technical Specifications

Night Vision Technology

Infrared LEDs • Enhanced Night Vision

Design & Build

- Robust outdoor casing
- Adjustable sun shield
- Wide-angle lens

Applications

Suitable Applications	Outdoor Security, Surveillance, Night Monitoring
