

12 1/4" Steel Body PDC Bit

This 12 1/4" steel body PDC bit is engineered for drilling applications. It features PDC cutters for efficient rock removal and extended bit life.

Overview

High-Performance Drilling Solution

This 12 1/4" steel body PDC bit is engineered for demanding drilling applications, offering efficient rock removal and extended service life. Constructed with a durable steel body and high-quality Polycrystalline Diamond Compact cutters, it ensures optimal performance across various geological formations. Its robust design is built to maintain reliability in diverse drilling conditions, making it a versatile choice for professional operations.

Technical Specifications

Bit Size

12.25 in

Bit Diameter

Model Designation	HPS5319 S223
Body Material	Steel Body
Cutter Technology	Polycrystalline Diamond Compact (PDC)

Performance & Application

Suitable Formations

- Variety of geological formations
- Efficient rock removal
- Extended bit life
- High-reliability drilling conditions

Quality & Compliance

Standards & Certifications	ISO
