High-Safety ISOFIX Child Restraint System

This ISOFIX baby seat safety belt is engineered to provide a secure and stable connection between child restraint systems and vehicle anchor points. Constructed from high-strength 100% polyester webbing, it features a robust push-button release mechanism with visual indicators for guaranteed locking. Designed for universal compatibility with most modern vehicles, this system ensures peace of mind and enhanced protection for young passengers during transit.

Key Features

The high-capacity connector ensures a secure latch to the vehicle's lower anchor bars.
