# Lead-Acid Battery Charger with Multiple Modes

This battery charger is designed for a variety of lead-acid batteries, offering multiple charging modes to accommodate different battery types and capacities. It features an integrated ammeter for real-time monitoring and LED indicators for displaying the charging status.

## Overview

**Professional Lead-Acid Battery Charger**

This robust and reliable battery charger is engineered to support a variety of lead-acid battery types and capacities. Featuring multiple charging modes, it offers versatility for both professional and DIY applications. Integrated safety mechanisms, including overload, short-circuit, and reverse polarity protection, ensure efficient and secure operation.

## Technical Specifications

**Charging Modes**

- Multiple charging modes
- Variable capacity support

| | |
|---|---|
| **Safety Protections** | Overload Protection, Short Circuit Protection, Reverse Polarity Protection |

## Monitoring & Interface

**Monitoring Tools**

**1 Real-time**
Integrated Ammeter

**Status Indicators**

Charging Status LED • Error Alert LED

## Design

**Design Features**

- Durable construction
- Portable design
