Manual Focus 35mm SLR Film Camera

This SLR film camera is designed for photography enthusiasts. It features a manual focus lens, providing precise control over depth of field.

Product Overview

Professional Manual Film Experience

The Phoenix DC828M is a versatile single-lens reflex (SLR) film camera engineered for photography enthusiasts who value precise manual control. Featuring a robust build of metal and plastic, it balances durability with ease of use for traditional film photography. The system supports interchangeable lenses and offers essential modes like manual and aperture-priority for creative flexibility.
