Mobile Engine Repair Unit

This mobile engine repair unit provides on-site power for automotive repairs. It features a diesel engine, generator, and cable spool housed for protection.

Overview

Mobile Engine Repair Unit

This mobile engine repair unit is engineered for versatility and reliability in demanding field environments. Featuring a robust protective housing, the system integrates a high-performance diesel engine and generator to provide consistent on-site power. With an included cable spool, it streamlines equipment operation and maintenance tasks, making it an essential solution for remote or mobile repair operations.

Technical Specifications

Integrated Components

- Diesel Engine
- Generator
- Cable Spool
- Protective Housing

Power Source	Diesel Engine

Features

Mobility & Design	Portable, Field-Ready, Protective Casing, Integrated Power
