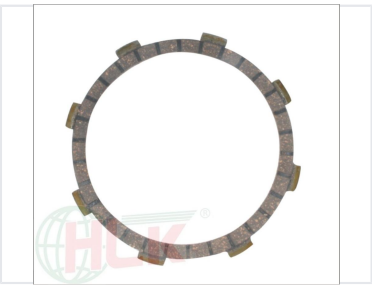
Motorcycle Clutch Friction Plate for RX125

This motorcycle clutch plate is designed for RX125 models. It has a 3.05mm thickness and a 124mm outer diameter.



Product Overview

High-Performance Clutch Friction Plate

This high-performance clutch friction plate is designed for optimal power transfer and smooth engagement in motorcycle transmissions. Constructed from premium A-class rubber and cork-based material, it offers excellent heat resistance and longevity even under demanding riding conditions. Precision-engineered for a perfect fit, this component helps improve clutch efficiency and significantly reduces slippage for a reliable riding experience.

Technical Dimensions

Outer Diameter	124 mm
Inner Diameter	100 mm
Thickness	3.05 mm

Material & Quality

Certifications ISO/TS16949	
Material Composition	A-class rubber and cork-based material
