Overview

Professional Grade Jaw Crusher

The PE Jaw Crusher is a classic primary crushing solution engineered for stability and high performance. Designed to process metallic and non-metallic ores, building aggregates, and artificial sand, it features a simple yet robust structure inherited from time-tested mechanical designs. This modular unit is ideal for demanding mining and construction environments requiring consistent, high-throughput material reduction.

Performance Metrics

Capacity

120 TPH
Rated Capacity

55 kW
Power

275 r/min
Speed

Technical Specifications

Model Specifications

Model	Feed Opening (mm)	Max Feeding (mm)	Discharge Range (mm)
PE500x750	500x750	425	50-100

Application

Suitable Materials

Granite, Marble, Basalt, Limestone, Quartz, Pebble, Copper Ore, Iron Ore

Features

Product Highlights

- Classic primary crushing design
- Simple, robust structure
- Stable working performance
- Modular design for easier transport
