Product Overview

Advanced Camera Monitoring System (CMS)

The 12.3-inch 1080P Blind Spot Rear View Mirror Monitor System is a sophisticated Camera Monitoring System (CMS) designed to replace traditional rear-view mirrors. By utilizing high-definition cameras and an A-pillar mounted display, it significantly reduces blind spots and improves overall driver situational awareness. This system offers enhanced night vision and auto-dimming capabilities, ensuring superior image quality and safety in various driving conditions.

Technical Specifications

Display Size	12.3 inch
Resolution Options	1080P, 720P
Compliance Standard	GB 15084-2013
