Power Tool Dust Extraction Vacuum

This vacuum cleaner is designed for integration with power tools to provide efficient dust collection. It features a stainless steel canister, a powerful motor, and a durable hose.

Product Overview

Industrial-Grade Dust Extraction

This high-performance 60L vacuum cleaner is expertly engineered for seamless power tool integration and superior dust collection. Built with a rugged stainless steel canister and a high-torque motor, it ensures robust suction for demanding workshop and construction site environments. Its mobility-focused design, featuring a wheeled base and integrated handle, makes it a reliable partner for maintaining clean and safe workspaces.
