

125A Electrical Circuit Breaker

This circuit breaker is designed for electrical protection. It features an adjustable thermal magnetic trip unit and conforms to IEC60947-2 and GB14048.2 standards.

Product Overview

Professional Circuit Protection

The DAM1 series circuit breaker is engineered for reliable current conduction and protection in electrical units. It effectively manages short circuits, overloads, and voltage fluctuations, ensuring the safety of your electrical infrastructure. Designed for operational versatility, this unit supports robust performance in demanding industrial and commercial environments.

Technical Specifications

Rated Current

63 A

Rated Current

Rated Voltage

500 V

Max Operational Voltage

400 V

Standards & Compliance

Compliance Standards

- IEC60947-2
- GB14048.2

Certifications

CE, ISO9001, RoHS, Intertek, KEDA

Features

Protection Features

Short Circuit Protection • Overload Protection • Adjustable Thermal Magnetic Trip
