Retractable Power Cord Reel with Circuit Breaker

This retractable cable reel is designed for power distribution in workshops and garages. It features a durable housing, automatic rewind mechanism, a swivel mounting bracket, a standard power outlet, and a circuit breaker for overload protection.

Overview

Professional Retractable Power Solution

This retractable power cord reel is engineered for efficient power distribution in demanding environments like workshops and garages. It features an automatic rewind mechanism and a swivel mounting bracket to ensure flexible positioning and a clutter-free workspace. Built-in safety features, including a circuit breaker, provide essential overload protection for reliable daily operation.

Key Features

Core Functionality

Automatic Rewind • Overload Protection • Swivel Mount • Retractable

Safety & Protection

Circuit Breaker	Yes
Protection Type	Overload protection with integrated circuit breaker

Installation & Use

Mounting System	Swivel mounting bracket for flexible positioning
Ideal Applications	Workshops, Garages, Industrial Workspaces

Design

Housing Type	Durable protective housing
Rewind Mechanism	Automatic spring-driven rewind
