Single-Cylinder Air-Cooled 4-Stroke Motorcycle Engine

This is a single-cylinder, air-cooled, four-stroke engine designed for motorcycles. It features an electric starter motor and cooling fins.

Product Overview

Reliable Power Solution

This single-cylinder, four-stroke motorcycle engine is engineered for consistent performance and efficiency. Featuring an air-cooled design with integrated cooling fins, it maintains optimal operating temperatures during use. The unit comes equipped with an electric starter motor, ensuring convenient and reliable ignition for various small vehicle applications.

Technical Specifications

Cooling System

Air-Cooled

Design Features

- Compact form factor
- Integrated cylinder head cooling fins
- Four-stroke cycle

Engine Type	Single-Cylinder, 4-Stroke
Starting Mechanism	Electric Starter

Application

Suitable Applications	Motorcycles, Small Vehicles, General Power
