Step-Through Frame Electric Bicycle with Basket and Passenger Seat

This electric bicycle features a step-through frame, a front basket, and a rear passenger seat with a backrest. Equipped with an electric motor, battery system, front and rear suspension, and a robust braking system, it is designed for urban commuting and leisure rides.

Product Overview

Urban Mobility Redefined

This step-through electric bicycle is engineered for efficient and eco-friendly urban commuting and leisure rides. Featuring a robust frame design, it includes practical additions like a front basket and a rear passenger seat with a backrest. With integrated lighting and a dual-suspension system, it offers a stable, comfortable, and safe transportation solution for daily travel.
